**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 13-16 are rejected under 35 U.S.C. 102(3) as being anticipated by Kato et al.

See reasons of record in the Office action of 14 March 2003. As noted in that Office action, the channels of the transistors above number 10A in figure 6 of Kato et al. are "electrically connected to each other and arranged separately and in parallel to each other." With respect to newly added claim 16, the channel areas are connected in parallel with respect to the current path that extends horizontally across the page. This current path direction defines the direction along which all the channels extend.

### ***Allowable Subject Matter***

Claims 10-12 are allowed. See the reasons given in the paper of 12 August 2003.

### ***Conclusion***

Applicant argues with respect to the rejected claims that the prior art does not show transistors "electrically connected in parallel." However, claims 13 does not use this language. Claim 13 says that the channel areas are "arranged separately and in parallel to each other." The limitation "in parallel" clearly refers to the geometric

arrangement. With respect to claim 14, no claim definition whatever is provided to determine what is a "virtual" channel width. The claim recites that such a width is "larger than a width of a defectively process area," so a width that is larger than the processed area will meet the claim limitation. Such a width must include "a separated space," because this is required by the claim language. The prior art also teaches separated spaces between channels. So the examiner does not see any structural distinction when comparing the claim to the prior art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
